A entrepreneurial student, currently pursuing a Degree in Smart Operations and Maintenance. My education as Business Engineer allowed me to develop an interest in many aspects within companies, focusing on both the use of data to improve processes. Since 2021, I am active in the Formula Student team UGent Racing, where I started as Event Manager and was promoted to board member in 2023. This position has given me the opportunity to get a deep dive into engineering and the operational difficulties that come together with managing an organisation. Furthermore, my Erasmus experience has allowed me to work in an international framework, learn how to adapt to a different culture and become fluent in English.

Educational Background

KU Leuven

Advanced Master in Smart Operations and Maintenance in Industry
2024-2025

University of Ghent

MSc in Business Engineering: Data Analytics
2022-2024
Cum Laude
