

STIJN VAN CLEEMPUT

PROFILE

I would describe myself as competitive and hands-on. I like to work together with likeminded people. Interested in the mechanical side of things.

LANGUAGES

EXPERIENCE

2019 – present: student jobs

I worked as a student within different companies, mostly in the logistical domain but also in production of Lotus Bakeries. Since 2020 I was mainly working for Volvo Logistics. In 2024 I started working as an intern at ADS engineering in Switzerland because I wanted to get more valuable experience that was more in line with my studies.

2023 – present: UGent Racing

Since August 2023 I'm active within UGent Racing, more specific in the composite team. In this project I am part of a group of 80 engineering students and each year we build a race car to take part in the international Formula Student competition. Starting September 2024 I will be transitioning to the aerodynamic team.

EDUCATION

Secondary

2015-2021
Science – mathematics (8u)

2021-present
UGent: Industrial engineering - electromechanics

SOFT SKILLS

- Leadership
- Communication
- Problem – solving
- Teamwork

HARD SKILLS

- Siemens NX
- Autocad Inventor
- TwinCat
- Eplan
- Fluidsim
